OUR VISION & MISSION

Our Mission

AleWorks is dedicated to producing distinctive and high-quality beers that celebrate the art of brewing. We specialize in a diverse range of handcrafted ales, from bold IPAs to smooth stouts, all made with the finest ingredients and traditional brewing techniques. By emphasizing creativity, innovation, and sustainability, we craft unique flavors that cater to both seasoned beer enthusiasts and newcomers alike. AleWorks is not just a brewery; it is a destination where craft beer lovers can enjoy exceptional brews and a vibrant, welcoming atmosphere.

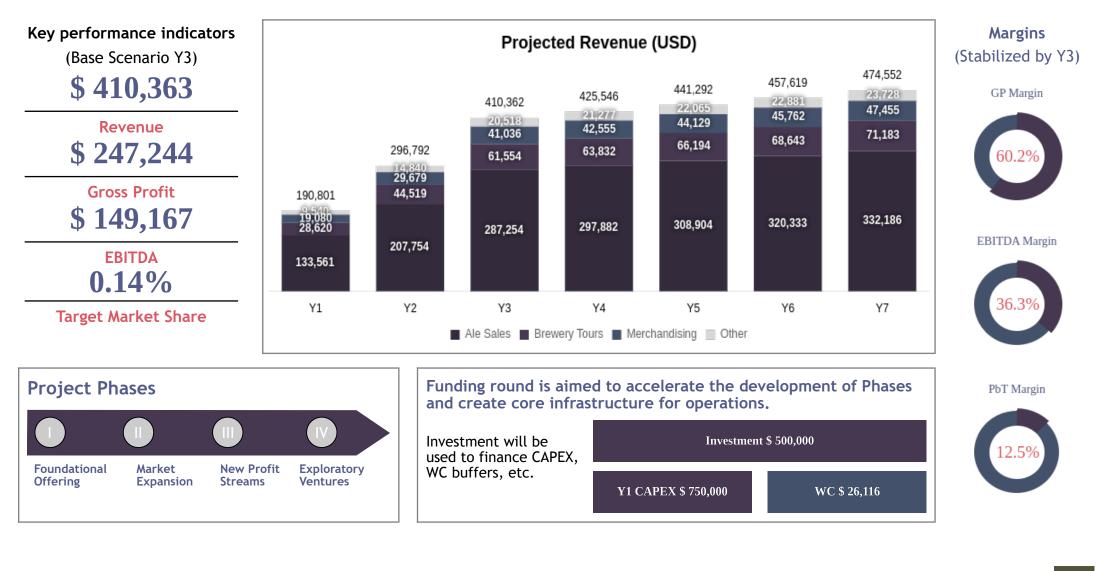

Our Vision

AleWorks envisions a future where it stands as a leading name in the craft beer industry, celebrated for its innovation, quality, and sustainability. In twenty years, AleWorks aims to have expanded its reach globally while maintaining its commitment to exceptional craftsmanship and eco-friendly practices. We aspire to create a community of craft beer lovers who see AleWorks not just as a brand, but as a destination where they can enjoy unique, high-quality brews in a convivial and inspiring environment. Our vision is to set new standards for brewing excellence and customer experience, making AleWorks synonymous with the art of craft beer.

The Main Phases: Projects & Impacts

General Overview

Product Impact on Core Stakeholders

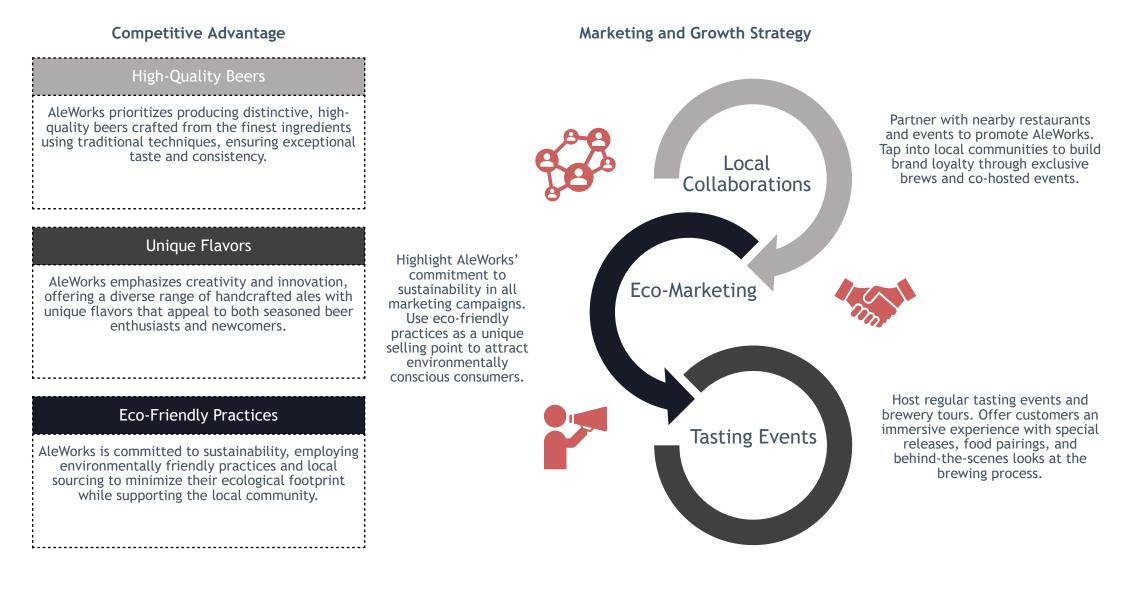

Company & Product

Main Stakeholder	Product Benefits
Customers	 Access to a diverse range of high-quality, handcrafted ales that cater to varied tastes. Enhanced customer experience through brewery tours and beer-related merchandise. Assurance of eco-friendly practices and local sourcing, promoting responsible consumption.
Employees	 Opportunities for career growth and skill development within a creative, innovative environment. Job stability through the company's expansion phases and new profit streams. Inclusive workplace culture emphasizing sustainability and craftsmanship.
Investors	 Strong potential for profitable returns through diversified revenue streams. Long-term growth prospects via high-reward ventures like sustainable packaging and international market entry. Confidence in a business model focused on quality, innovation, and market expansion.
Local Community	 Economic boost through job creation and local sourcing of ingredients. Community engagement via events, brewery tours, and supporting local causes. Promotion of sustainable practices, contributing to environmental health.
Suppliers1. Steady demand for high-quality, locally-sourced ingredients aligning with AleWorks' standards.2. Opportunities for long-term partnerships through AleWorks' growth and market expansion phases.3. Collaborative efforts in sustainability initiatives, fostering mutual growth.	
Distributors	 Expansion of product offerings with a variety of distinctive ales appealing to diverse markets. Increased business volume through AleWorks' market expansion and diversified beer portfolio. Strengthened relationships by aligning on distribution goals and market strategy.
Regulatory Bodies	 Assurance of compliance and adherence to industry standards and regulations. Promotion of responsible drinking and sustainability through AleWorks' eco-friendly practices. Role as a model brewery demonstrating excellence in quality and ethical operations.

Ale

Painpoints & Solutions

Company & Product

September 2024

Core Features of Phase I - II

Strategic Analysis: SWOT

1 2 3 4 5 6 7 8

Company & Product

- High-quality and distinctive beers leveraging traditional brewing techniques.
- Diverse range of handcrafted ales catering to various tastes.
- Emphasis on creativity and innovative flavor profiles.
- Commitment to sustainability through eco-friendly practices.
- Strong brand identity and dedicated local following.

- Limited scalability due to handcrafted production methods.
- Higher production costs associated with premium ingredients.
- Niche market, potentially excluding mass-market
- consumers.

Weaknesses

- Dependence on local sourcing may limit ingredient availability.
- Potential challenges in maintaining consistent quality at scale.

- Expanding into new markets and regions.
 Developing seasonal and limited-edition brews.
 Collaborations with local businesses and events.
 Tapping into the growing craft beer tourism industry.
 Leveraging digital marketing to reach broader audiences.
- Intense competition within the craft beer industry.
- Market saturation in certain regions.
- Fluctuations in raw material costs impacting profitability.
- Changing consumer preferences and trends.
- Regulatory changes affecting the beverage manufacturing sector.

Pestel: Analysis

Revenue Formation Narrative

AleWorks operates within the Manufacture of beverages industry, specializing in high-quality crafted ales. Given the projected Total Addressable Market (TAM) of 272,572,685 USD, AleWorks aims to capture a Serviceable Available Market (SAM) of approximately 0.7%. This conservative estimate accounts for AleWorks' focus on handcrafted brews and sustainable practices that align well with consumer preferences, although market penetration will be gradual due to competitive pressures and limited resources. For the Serviceable Obtainable Market (SOM), AleWorks anticipates capturing 10% in Year 1, translating to 190,801 USD in revenue. This estimate is based on strategic local positioning and a focus on quality and sustainability, which are expected to resonate well with local consumers. As AleWorks establishes a stronger market presence and builds brand loyalty, the SOM is projected to increase to 15% in Year 2, resulting in 296,791 USD in revenue, and further grow to 20% in Year 3, yielding 410,363 USD in revenue. AleWorks' revenue streams are diversified across four primary lines of business: Ale Sales contributing 70% of total revenue, equating to 133,561 USD in Year 1; Brewery Tours accounting for 15%, or 28,620 USD ; Merchandising at 10%, or 19,080 USD ; and other revenue streams making up the remaining 5%, or 9,540 USD . This diversified revenue model ensures stability and growth potential as AleWorks continues to expand its footprint within the competitive craft brewery market in Bulgaria.

Cost of Capital: CAPM Inputs

1 2 3 4 5 6 7 8

Business Valuation

Methodology

Weighted Average Cost of Capital is calculated using Capital Asset Pricing Model (CAPM). Since the company is purely equity funded the WACC is equal to its Required Return on Equity R(E). The main research inputs used in calculations are based on studies published by professor at Stern School of Business Aswath Damodaran. Return on Equity R(E) is $R(E)=R(F)+\beta * (ERP)$, where: R(F) is Risk Free Rate. The basis for calculation of R(F) is the average of the yield of USD 30 Year TSY Bond. The horizon. ERP is Mature Market Equity Risk Premium. It incorporates market estimates for Rating-Based Default Spread and Default Spread Multiple (β) is average equity betas of corresponding industries. Despite the company has no debt, the unlevered beta was levered with industry average figures to reflect the long-term D/E ration in the capital structure. Additionally, Illiquidity Risk Premiumof 4% is added to the estimated Return on Equity to reflect risk associated with firm being Privately Held vs Publicly Traded Companies.

Additional Assumptions

To calculate the companies Firm Value, its future Free Cash Flow to Equity (FCFE) is discounted using estimated Required Return on Equity.

The 3rd-year projected cash flow is used as a representation of the long-term Free Cash Flow to the Equity (FCFE). This approach may understate the valuation because cash flows are expected to grow more aggressively in the first 10 years, and the growth from years 4 to 10 is not reflected in this calculation. Long-term growth rate of 5% is applied.

After discounting the cashflows and measuring the Firm Value it is adjusted to historical estimate of Start-up firm's survival rate. The allows to incorporate risk of start-ups fails.

	NPV (USD)	356,157								

1 2 3 4 5 6 7 8

Business Valuation

The valuation is conducted using the Discounted Cash Flow (DCF) method. In this method, the projected cash flows for a period of 7 years, along with a terminal value, are discounted at a rate of 13.24 % to determine the Firm Value.

Starting from year 3 onwards, the cash flows are estimated to grow at a rate of 3.70 %, which is consistent with the market Compound Annual Growth Rate (CAGR) trend. Beyond year 7, the cash flows are assumed to grow at a long-term growth rate of 3.50 %.

To account for the inherent risks associated with a start-up venture, the Firm Value is adjusted using the historical survival rate of newly established firms. As indicated by the study conducted by Aswath Damodaran, there was approximately 50% probability of survival for Information sector companies. This adjustment allows to incorporate the risk profile of the business and provide a more comprehensive assessment of its value.

It is important to note that if the company can successfully navigate through its initial three years of operation, it is expected to have a significantly higher likelihood of becoming a going concern. This underscores the importance of demonstrating resilience and establishing a solid foundation during the critical early stages of the business.

Scenario Analysis: Narrative

1 2 3 4 5 6 7 8 Scenario Analyses

Scenario analysis explores how external and internal factors influence key assumptions in financial planning. By analyzing potential positive and negative outcomes, company can better anticipate risks and opportunities when evaluating their future cash flows and overall valuation.

КРІ	Scenario	Narrative	KPI affected by
D	Positive	This scenario reflects a favorable market environment or a strategic breakthrough, leading to higher projected revenue. It showcases the potential rewards of scaling and innovative approaches.	higher by 15%
Revenue	Negative	This scenario accounts for challenging conditions such as economic downturns or market disruptions, forecasting a potential revenue decrease. It emphasizes the importance of adaptability and risk management.	lower by 15%
6065	Positive	This scenario demonstrates the benefits of operational efficiency or cost-saving strategies, resulting in reduced COGS. It highlights the value of innovation in supply chain and operations.	lower by 20%
COGS	Negative	This scenario addresses rising costs due to external pressures, resulting in an increase in COGS. It underlines the need for proactive cost- control measures.	higher by 20%
Discount	Positive	This scenario assumes a decrease in the discount rate (RoE) due to improved market conditions, lower perceived risk, or favorable macroeconomic factors. A lower discount rate increases the present value of future cash flows, enhancing the company's valuation.	lower by 10%
Rate (RoE)	Negative	This scenario models an increase in the discount rate (RoE) driven by higher market risk, macroeconomic instability, or industry-specific challenges. A higher discount rate reduces the present value of future cash flows, decreasing the company's valuation.	higher by 10%
