Partners	<ol style="list-style-type: none"> 1. Mutually beneficial collaborations and joint venture opportunities. 2. Shared expertise and resources leading to successful project outcomes. 3. Strengthened relationships and expanded networks within the industry.
Regulatory Bodies	<ol style="list-style-type: none"> 1. Compliance with all legal and regulatory requirements to ensure ethical business practices. 2. Contribution to the stability and efficiency of the real estate market. 3. Active engagement in industry advocacy and standards development.
Suppliers	<ol style="list-style-type: none"> 1. Long-term, reliable partnerships with consistent demand for services and products. 2. Opportunities to collaborate on innovative projects and technological advancements. 3. Growth prospects through participation in large-scale development projects.

Key Performance Components

Competitive Advantage

Extensive Network

Prime Property Investments leverages a vast network of industry connections, providing clients with access to exclusive, high-value investment properties not readily available to the public.

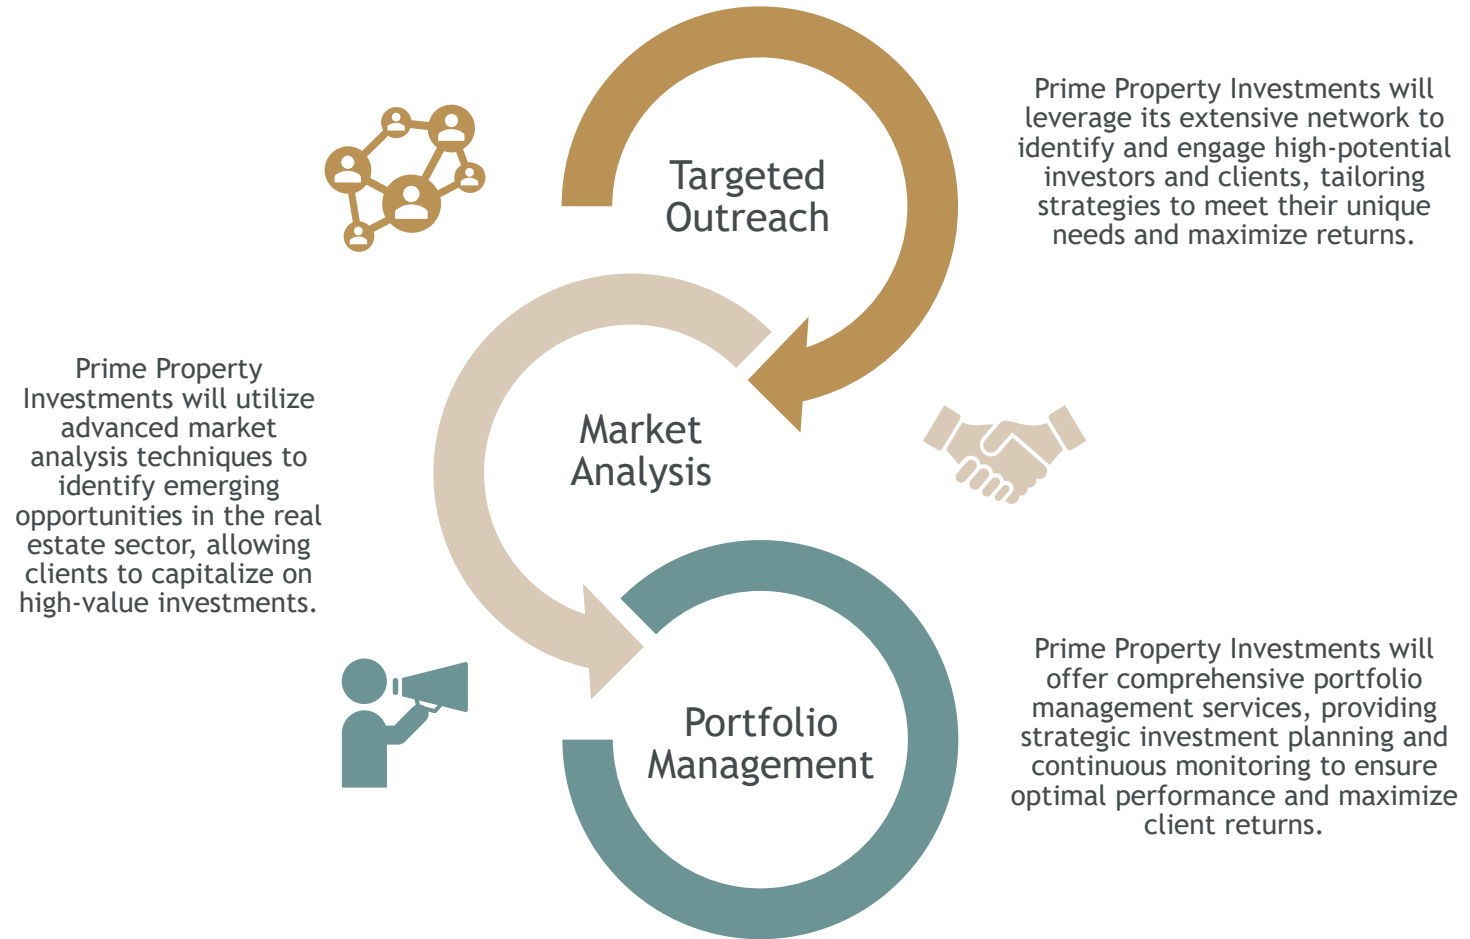

Comprehensive Services

Their array of services spans market analysis, property acquisition, portfolio management, and strategic planning, offering a one-stop solution for all real estate investment needs.

Industry Expertise

The firm's deep expertise in real estate enables them to identify lucrative opportunities and provide insightful guidance, ensuring clients maximize returns on their investments.

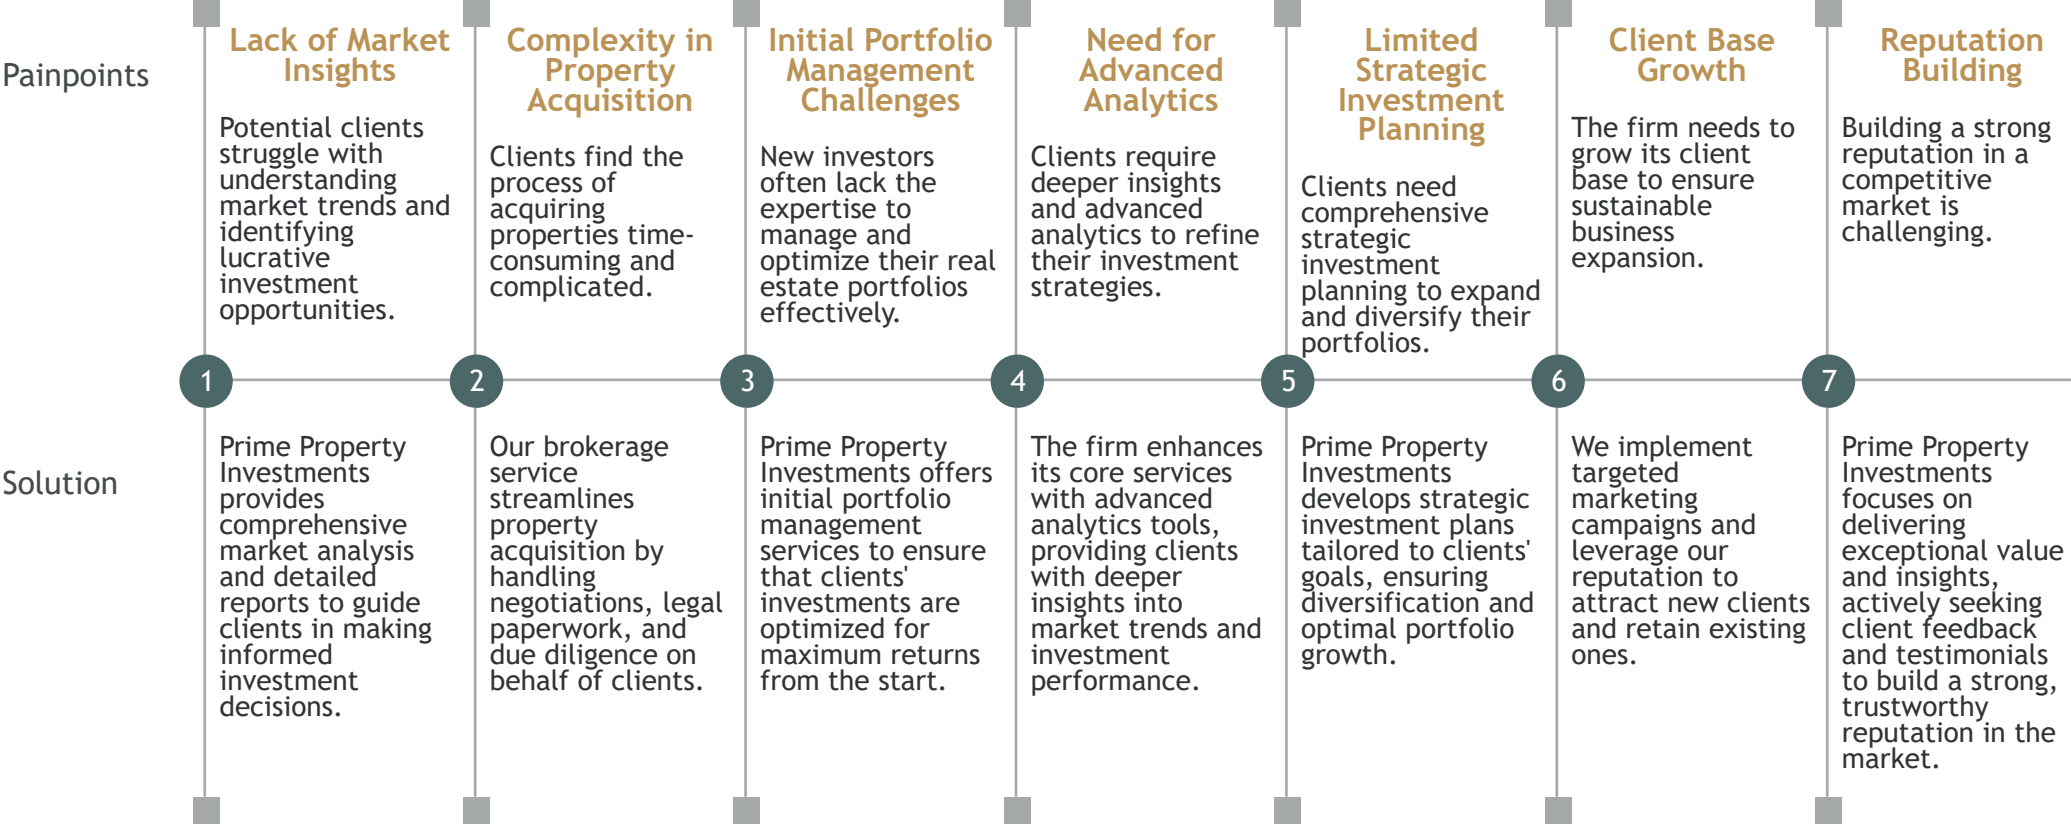

Marketing and Growth Strategy

Target Groups

Industries		Description
I	 Individual Investors	High-net-worth individuals seeking lucrative real estate investment opportunities and personalized portfolio management services.
II	 Institutional Investors	Pension funds, insurance companies, and educational endowments looking for stable, high-yield real estate investments to diversify their portfolios.
III	 Real Estate Developers	Companies focused on large-scale development projects requiring strategic investment planning, property acquisition, and advanced market analysis.
IV	 Private Equity Firms	Firms needing expert guidance in navigating high-value real estate acquisitions and strategic portfolio expansion to maximize returns.
V	 Family Offices	Wealth management entities representing affluent families, seeking tailored real estate investment strategies and comprehensive asset management.
VI	 Corporate Investors	Corporations looking to invest in commercial properties to either expand their business operations or diversify their investment portfolios.
VII	 Real Estate Investment Trusts (REITs)	Publicly traded and private REITs aiming to strengthen their property portfolios with high-quality acquisitions and expert management services.

Solution from Phase I to Phase IV

Strategic Analysis: SWOT

Strength

Extensive network provides access to premium investment properties. Comprehensive services cover market analysis, property acquisition, and portfolio management. Expertise in strategic investment planning maximizes returns. Strong industry reputation as a leading real estate investment brokerage. Commitment to precision and integrity in guiding clients.

Weaknesses

Dependency on the real estate market's health and stability. High competition in the real estate brokerage industry. Resource-intensive operations may limit scalability. Potential over-reliance on a few key clients. Vulnerability to economic downturns impacting real estate investments.

Opportunities

Expansion into emerging real estate markets. Development of new services such as sustainable property investments. Leveraging technology for enhanced market analysis and client engagement. Forming strategic partnerships with property developers. Increasing demand for real estate investment diversification.

Threats

Market volatility and economic downturns affecting investment returns. Regulatory changes impacting the real estate sector. Rising interest rates reducing investment attractiveness. Growing competition from other investment brokerage firms. Fluctuations in property values affecting client portfolios.

Pestel: Analysis

 P	 E	 S	 T	 E	 L						
Political	0 / 10	Economic	0 / 10	Social	0 / 10	Technological	0 / 10	Environmental	0 / 10	Legal	0 / 10
<p>Regulations: Changes in real estate regulations affect market dynamics.</p> <p>Property Taxes: Fluctuations in property taxes can impact investment profitability.</p>	<p>Interest Rates: Rising interest rates could affect property financing costs.</p> <p>Market Trends: Economic cycles influence demand for real estate investments.</p>	<p>Urbanization: Increasing urbanization boosts demand for investment properties.</p> <p>Demographics: Aging population trends influence market needs and preferences.</p>	<p>PropTech: Adoption of property technology enhances efficiency.</p> <p>Online Platforms: Digital property listings increase market reach.</p>	<p>Sustainable Buildings: Demand for eco-friendly buildings impacts investment decisions.</p> <p>Climate Risk: Climate change affects property viability and insurance costs.</p>	<p>Property Rights: Clear property rights are critical for seamless transactions.</p> <p>Zoning Laws: Zoning regulations impact development and property use.</p>						

Prime Property Investments is strategically positioned to navigate the complex real estate market. Acknowledging and adapting to PESTEL factors enables the company to optimize investment opportunities and manage risks effectively.

Scores reflect the relative importance and potential impact of each PESTEL factor on the business

VRIO Framework: Analysis

Does the resource or capability enable the firm to exploit an opportunity or neutralize a threat in the environment?

Prime Brokerage enables the firm to exploit high-value real estate opportunities and to neutralize market threats with industry expertise and innovative solutions.

Is the resource or capability controlled by only a few firms or no other firms?

The firm's extensive network and access to premium investment properties are controlled by only a few firms in the market.

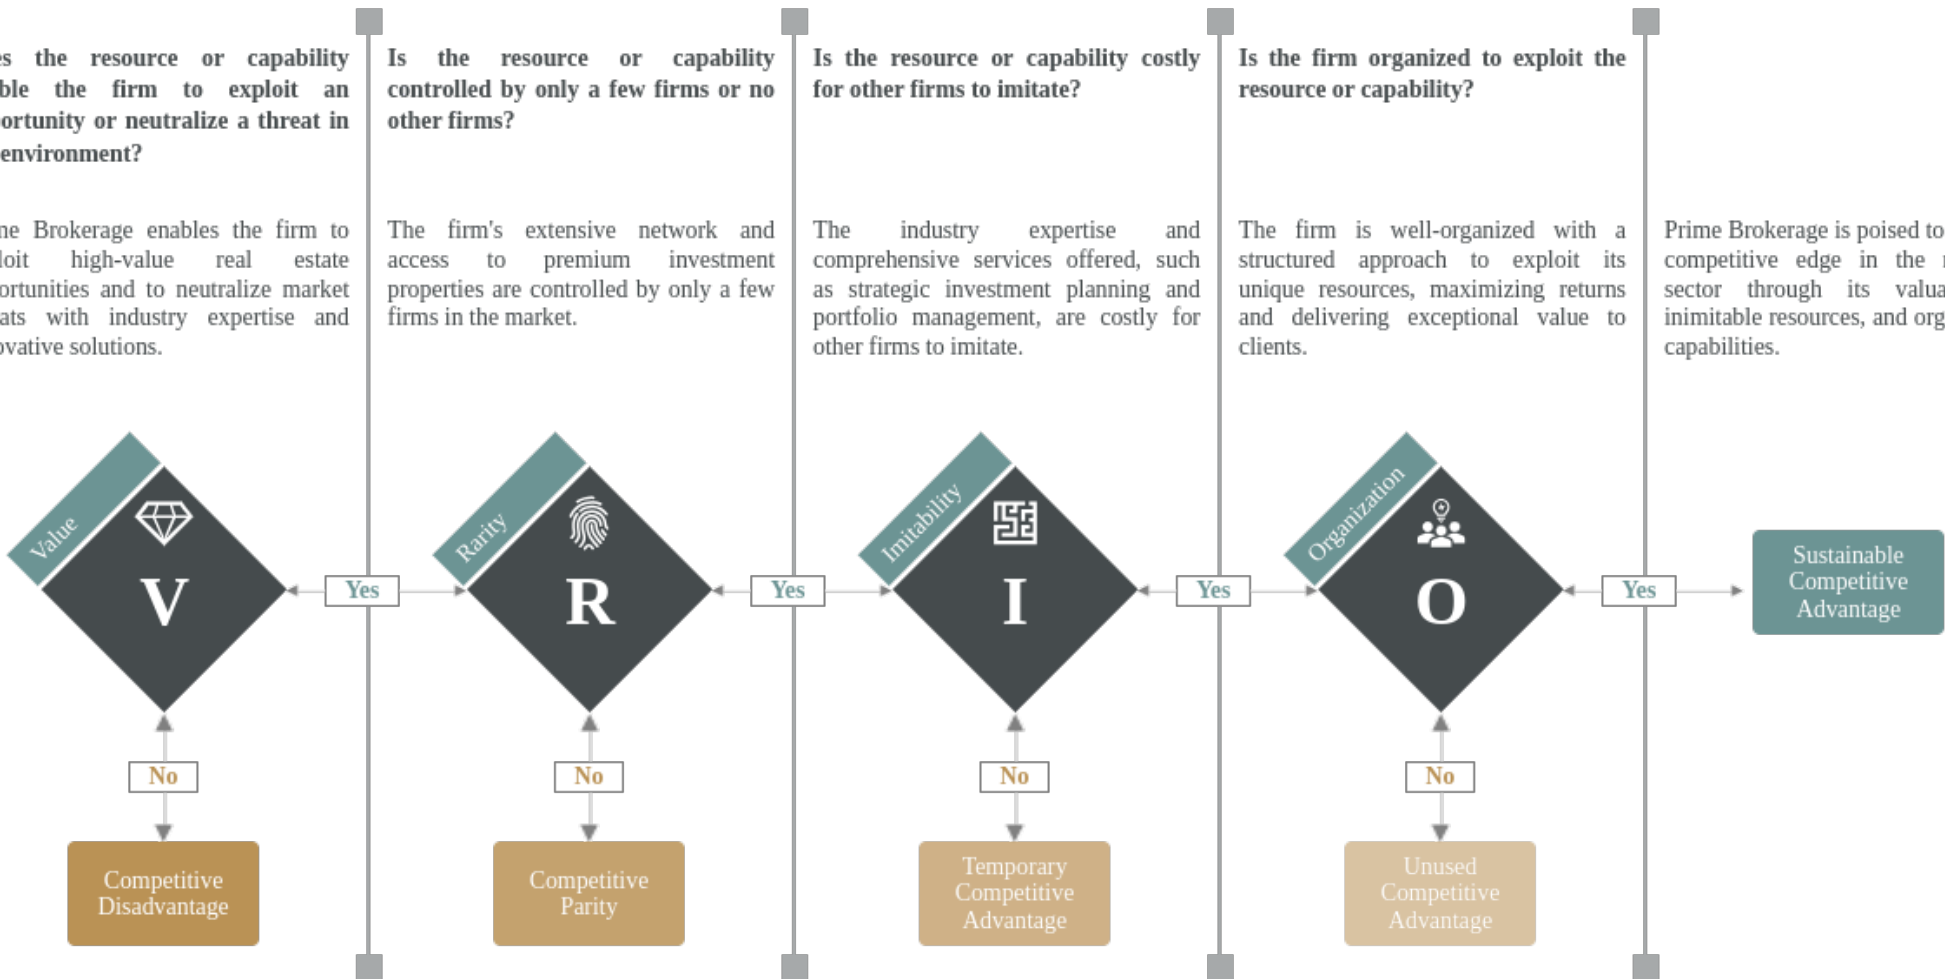

Is the resource or capability costly for other firms to imitate?

The industry expertise and comprehensive services offered, such as strategic investment planning and portfolio management, are costly for other firms to imitate.

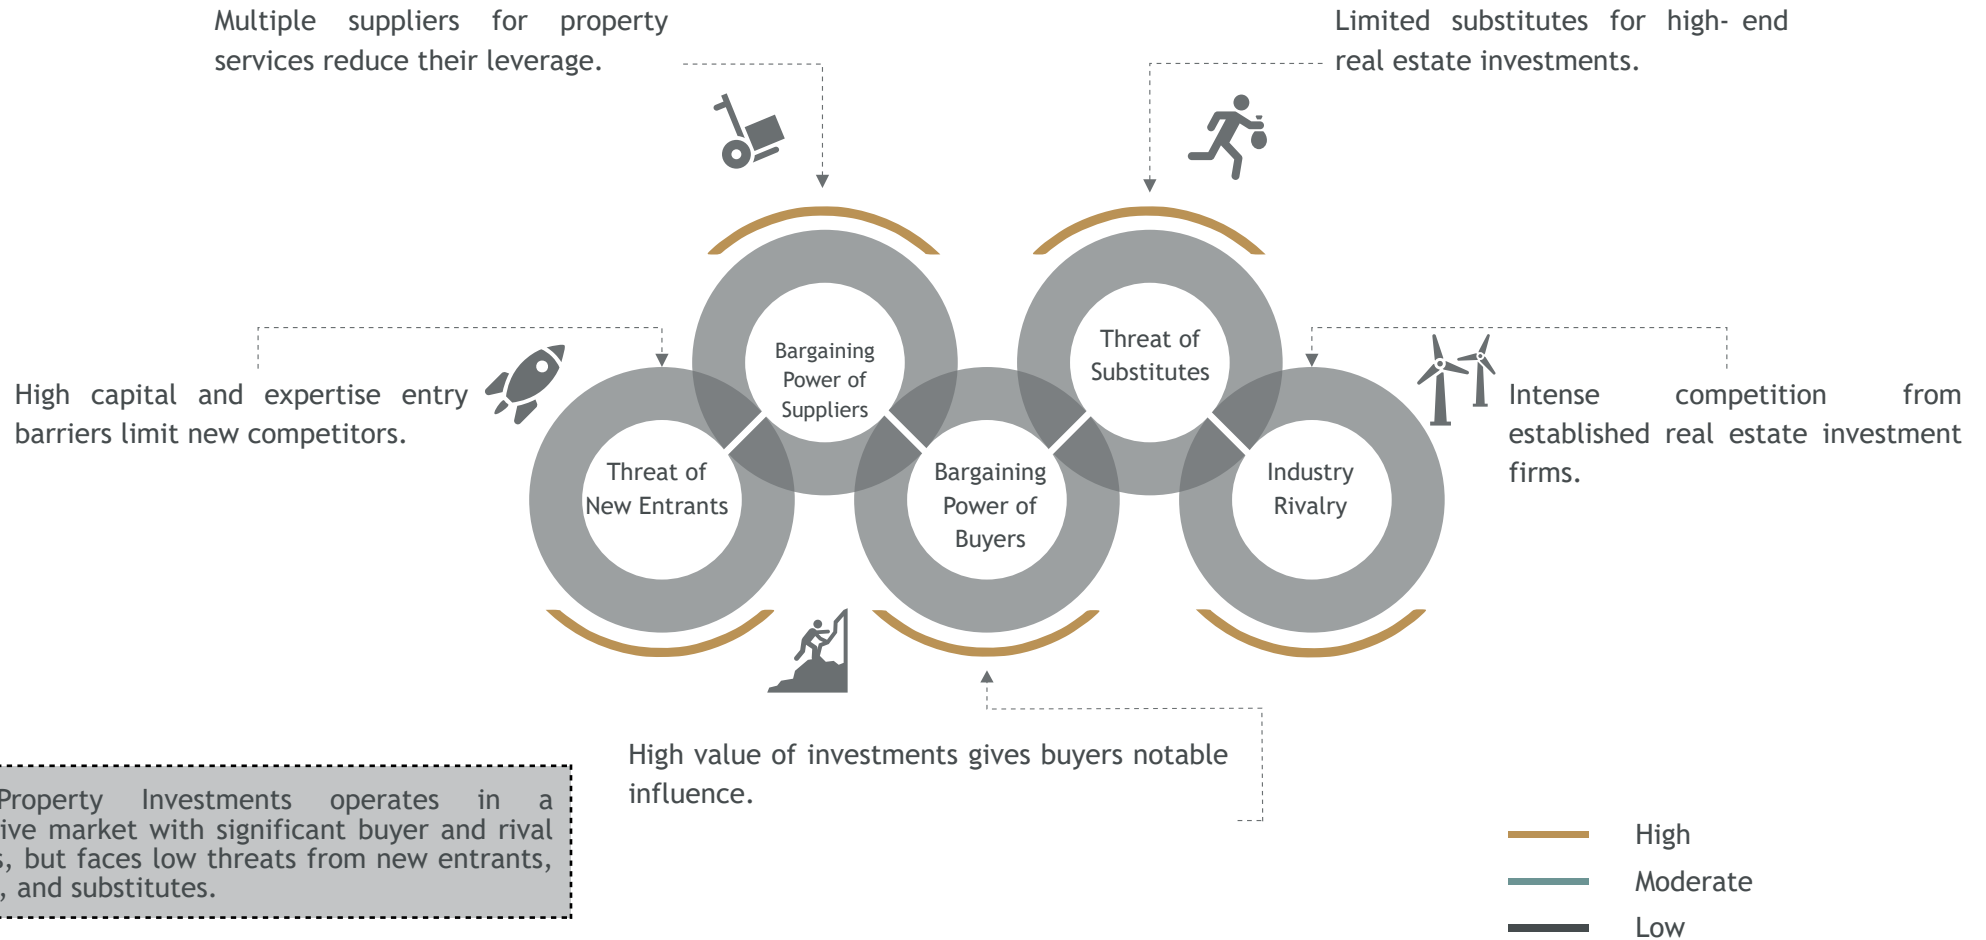

Is the firm organized to exploit the resource or capability?

The firm is well-organized with a structured approach to exploit its unique resources, maximizing returns and delivering exceptional value to clients.

Prime Brokerage is poised to maintain a competitive edge in the real estate sector through its valuable, rare, inimitable resources, and organizational capabilities.

Core Risks & Mitigation Strategies

1. Operation and maintenance risks

#	Risk Type	Area	Mitigation Strategy
1	Property maintenance issues	COO	Implement regular maintenance schedules and establish relationships with reliable contractors to ensure timely repairs and upkeep of properties.
2	Technology failures	CTO	Implement robust and redundant technology infrastructure, regularly update systems, and conduct periodic cybersecurity assessments.
3	Inaccurate market analysis	CIO	Employ advanced data analytics and regularly update market data sources to ensure accuracy in market analysis and forecasting.
4	Client dissatisfaction	CMO	Maintain constant communication with clients, gather feedback regularly, and implement a customer relationship management (CRM) system to track and address concerns promptly.
5	Staff turnover	COO	Develop comprehensive training and retention programs, create a positive work environment, and offer competitive compensation packages to retain talent.

2. Regulatory and legal risks

#	Risk Type	Area	Mitigation Strategy
1	Compliance with Local Real Estate Laws	CRO	Regularly update on local laws.
2	Licensing Issues	COO	Ensure all brokers are properly licensed.
3	Anti-Money Laundering (AML) Regulations	CFO	Implement strong AML policies.
4	Fair Housing Act Compliance	CSO	Train staff on Fair Housing standards.
5	Data Protection and Privacy Laws	CIO	Use robust data protection protocols.

3. Strategic/Market Risk

#	Risk Type	Area	Mitigation Strategy
1	Market Volatility	CEO	Diversify portfolios to spread risk.
2	Client Attrition	CMO	Enhance client engagement and satisfaction programs.
3	Competitive Pressure	CSO	Focus on unique value propositions and continuous innovation.
4	Economic Downturn	CFO	Build financial reserves and optimize operational costs.
5	Technological Disruption	CTO	Invest in cutting-edge technology and continuous learning.

4. Finance risk

#	Risk Type	Area	Mitigation Strategy
1	Market Volatility	CFO	Diversify investment portfolio
2	Client Default	CRO	Conduct stringent client vetting
3	Liquidity Issues	CFO	Maintain adequate cash reserves
4	Funding Shortfalls	CEO	Develop alternative funding sources
5	Revenue Fluctuations	CFO	Implement robust forecasting and planning

5. Other general risk

#	Risk Type	Area	Mitigation Strategy
1	Market Volatility	CRO	Diversify investment portfolio
2	Talent Retention	COO	Offer competitive compensation and career growth
3	Reputation Damage	CMO	Implement robust PR strategies
4	Client Dependence	CEO	Diversify client base
5	Economic Downturn	CFO	Build financial reserves

Market Overview (TAM, SAM and SOM)

Funding Allocation

The funding will be used to finance the CAPEX and cash deficit from Year 1 operations, aiming to expedite the development process. In subsequent years the company plans to sustain operations without requiring major additional capital injection. Table below presents the overview of expected inflows and outflows.

The total investment required is \$ 500,000

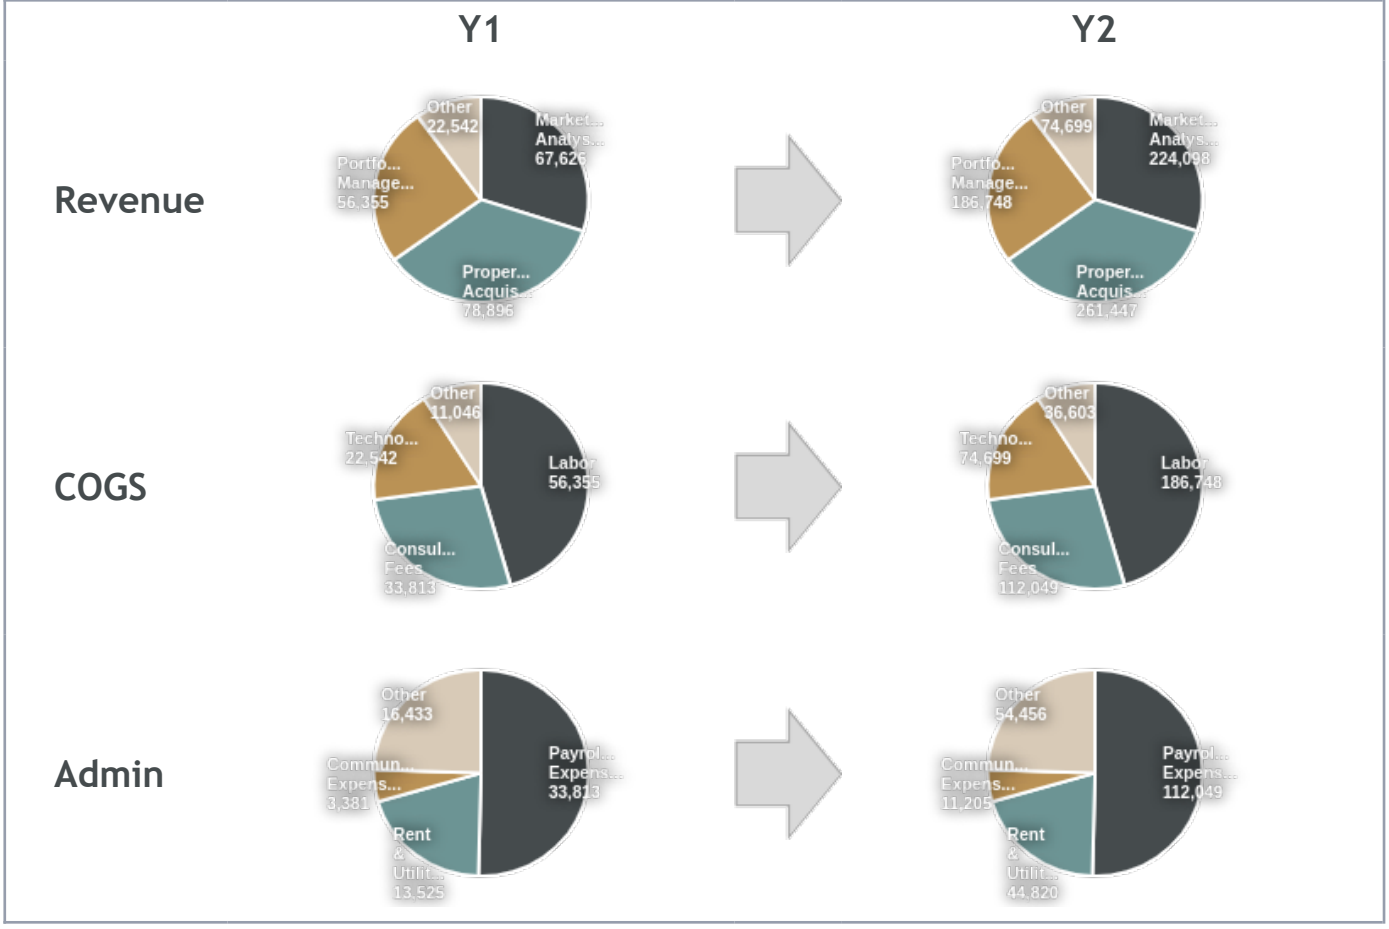

Y1 Cash Flow Stream(USD)	Inflows	Outflows
Gross Profit	101,664	
Payroll Expenses		33,813

Business Line Breakdown (USD)

Revenue Formation Narrative

Prime Property Investments forecasts a steady increase in market share within the real estate sector in Ogre, Latvia. Our Total Addressable Market (TAM) is valued at 375,697,345 USD. Given our specialized focus on high-value real estate investments, combined with comprehensive service offerings in market analysis, property acquisition, portfolio management, and strategic investment planning, we project a Serviceable Addressable Market (SAM) capture of 1.2%. This estimation leverages our significant capital, extensive network, and industry expertise while considering the competitive landscape and market penetration challenges typical for SMEs. In Year 1, Prime Property Investments aims for a Serviceable Obtainable Market (SOM) of 5.00000%, reflecting initial capital constraints and the high market concentration, resulting in an estimated revenue of 225,418,407 USD. With strategic investment and network expansion, we project our SOM to grow to 10.00000% in Year 2, with an estimated revenue of 473,829,492 USD. By Year 3, our SOM is targeted to increase to 15.00000%, resulting in projected revenue of 746,992,193 USD. Our revenue streams will be diversified across four main lines of business: Market Analysis (30% of total revenue), Property Acquisition (35%), Portfolio Management (25%), and Other services (10%). These estimations reflect our strategy to build a firm market presence and gradually scale our operations, driving sustainable growth and profitability.

\$ 746,992 ^{Y3} Projected Revenue **0.18%** Market share

Required Return on Equity Derivation

Methodology

Weighted Average Cost of Capital is calculated using Capital Asset Pricing Model (CAPM). Since the company is purely equity funded the WACC is equal to its Required Return on Equity R(E). The main research inputs used in calculations are based on studies published by professor at Stern School of Business Aswath Damodaran. Return on Equity R(E) is $R(E) = R(F) + \beta * (ERP)$, where: R(F) is Risk Free Rate. The basis for calculation of R(F) is the average of the yield of USD 30 Year TSY Bond. The horizon. ERP is Mature Market Equity Risk Premium. It incorporates market estimates for Rating-Based Default Spread and Default Spread Multiple (β) is average equity betas of corresponding industries. Despite the company has no debt, the unlevered beta was levered with industry average figures to reflect the long-term D/E ration in the capital structure. Additionally, Illiquidity Risk Premium of 4% is added to the estimated Return on Equity to reflect risk associated with firm being Privately Held vs Publicly Traded Companies.

Additional Assumptions

To calculate the companies Firm Value, its future Free Cash Flow to Equity (FCFE) is discounted using estimated Required Return on Equity.

The 3rd-year projected cash flow is used as a representation of the long-term Free Cash Flow to the Equity (FCFE). This approach may understate the valuation because cash flows are expected to grow more aggressively in the first 10 years, and the growth from years 4 to 10 is not reflected in this calculation. Long-term growth rate of 5% is applied.

After discounting the cashflows and measuring the Firm Value it is adjusted to historical estimate of Start-up firm's survival rate. The allows to incorporate risk of start-ups fails.

Average Survival Rate for 3 Years

50%

Final Valuation

\$ 220,485

The valuation is conducted using the Discounted Cash Flow (DCF) method. In this method, the projected cash flows for a period of 7 years, along with a terminal value, are discounted at a rate of 13.51 % to determine the Firm Value.

Starting from year 3 onwards, the cash flows are estimated to grow at a rate of 5.10 %, which is consistent with the market Compound Annual Growth Rate (CAGR) trend. Beyond year 7, the cash flows are assumed to grow at a long-term growth rate of 3.50 %.

To account for the inherent risks associated with a start-up venture, the Firm Value is adjusted using the historical survival rate of newly established firms. As indicated by the study conducted by Aswath Damodaran, there was approximately 50% probability of survival for Information sector companies. This adjustment allows to incorporate the risk profile of the business and provide a more comprehensive assessment of its value.

It is important to note that if the company can successfully navigate through its initial three years of operation, it is expected to have a significantly higher likelihood of becoming a going concern. This underscores the importance of demonstrating resilience and establishing a solid foundation during the critical early stages of the business.

Scenario Analysis: Narrative

Scenario analysis explores how external and internal factors influence key assumptions in financial planning. By analyzing potential positive and negative outcomes, company can better anticipate risks and opportunities when evaluating their future cash flows and overall valuation.

KPI	Scenario	Narrative	KPI affected by
Revenue	Positive	This scenario reflects a favorable market environment or a strategic breakthrough, leading to higher projected revenue. It showcases the potential rewards of scaling and innovative approaches.	higher by 15%
	Negative	This scenario accounts for challenging conditions such as economic downturns or market disruptions, forecasting a potential revenue decrease. It emphasizes the importance of adaptability and risk management.	lower by 15%
COGS	Positive	This scenario demonstrates the benefits of operational efficiency or cost-saving strategies, resulting in reduced COGS. It highlights the value of innovation in supply chain and operations.	lower by 20%
	Negative	This scenario addresses rising costs due to external pressures, resulting in an increase in COGS. It underlines the need for proactive cost-control measures.	higher by 20%
Discount Rate (RoE)	Positive	This scenario assumes a decrease in the discount rate (RoE) due to improved market conditions, lower perceived risk, or favorable macroeconomic factors. A lower discount rate increases the present value of future cash flows, enhancing the company's valuation.	lower by 10%
	Negative	This scenario models an increase in the discount rate (RoE) driven by higher market risk, macroeconomic instability, or industry-specific challenges. A higher discount rate reduces the present value of future cash flows, decreasing the company's valuation.	higher by 10%

Scenario Analysis: Results

Scenario analysis explores how external and internal factors influence key assumptions in financial planning. By analyzing potential positive and negative outcomes, company can better anticipate risks and opportunities when evaluating their future cash flows and overall valuation.

Stress Test: Growth Under Pressure

Stress tests provide a comprehensive view of how businesses might perform under extreme conditions, enabling better preparation for the uncertainties of real-world challenges.

Scenario Name	Story	KPIs impact	
Growth Under Pressure	This scenario explores the challenges of managing rapid growth while dealing with operational bottlenecks. A surge in demand and revenue places significant strain on supply chains and internal processes. Despite achieving higher sales volumes, inefficiencies in scaling lead to increased costs and a heightened risk perception, keeping the discount rate elevated. 'Growth Under Pressure' examines how businesses can balance seizing growth opportunities while investing in infrastructure, talent, and systems to support scalability.	Revenue Higher by 20%	COGS Higher by 30%

Stress Test: The Perfect Storm

Stress tests provide a comprehensive view of how businesses might perform under extreme conditions, enabling better preparation for the uncertainties of real-world challenges.

Scenario Name

Story

KPIs impact

The Perfect Storm

This scenario simulates the convergence of adverse market conditions and rising operational challenges. A sharp downturn in market demand coincides with increased costs due to inflation and supply chain disruptions. The combination results in a dual hit to both top-line revenue and operational margins. Additionally, external factors such as economic instability elevate the discount rate, amplifying the pressure on future cash flows. Businesses facing 'The Perfect Storm' must focus on resilience through diversified revenue streams, cost-control measures, and contingency planning.

Disclaimer

The following information and valuation analysis are provided for informational purposes only and do not constitute financial or investment advice. This presentation is based on assumptions, projections, and historical data, which are subject to inherent uncertainties and risks.

Please note that the valuation results presented here are based on the Discounted Cash Flow (DCF) method and various assumptions, including projected cash flows, growth rates, discount rates, and survival rates. These assumptions are subject to change and may not accurately reflect future market conditions or the performance of the business.

The valuation does not guarantee future financial performance or the accuracy of the projections. Actual results may differ materially from those presented in this analysis due to numerous factors, including but not limited to changes in economic conditions, market dynamics, competition, regulatory factors, and unforeseen events.

Investors and stakeholders are advised to conduct their own independent research, seek professional advice, and carefully consider their individual investment objectives, risk tolerance, and financial situation before making any investment decisions. The information provided in this presentation should not be relied upon as the sole basis for making investment decisions.

Furthermore, no representation or warranty, express or implied, is made regarding the accuracy, completeness, reliability, or availability of the information and analysis presented in this presentation. We disclaim any liability for any loss or damage, including but not limited to indirect or consequential loss information provided.

Past performance is not indicative of future results. Any historical financial information included in this presentation is provided for reference purposes only and may not reflect the current financial position or performance of the business.

The valuation presentation is intended solely for the recipient's use and may not be reproduced, redistributed, or disclosed, in whole or in part, without the prior written consent of the company.
